Senior Level Designer | Gameplay Designer

AAA Level Designer specializing in gameplay-driven multiplayer experiences, interactive environments and full ownership of level development – from concept and gameplay prototyping to live release. Passionate about crafting memorable player experiences through strong pacing, encounter design and close collaboration across multidisciplinary teams.

Experience

WARGAMING

Level Designer (World of Tanks) | 2022 – Present, 4 yrs 6 mos

- Owned the end-to-end development of multiplayer levels, driving gameplay from concept, layouts and greyboxing through implementation, playtesting, balancing and release while collaborating across multidisciplinary teams to align gameplay, visual storytelling and technical goals. Leveraged gameplay metrics, player feedback and data-driven insights to guide balancing, iteration and player experience improvements.
 - Shipped 10+ Random Event scenarios across 30% of the project's maps, reaching +60% Peak CCU, +20% AU on version updates and 90%+ positive player feedback.
 - Owned production of the Neon Dash live event, achieving 33% AU participation, 27% Day-2 retention, 15% Day-3 retention, and one of the highest average playtimes among live events.
 - Reworked and rebalanced 50%+ of the project's maps, including complete redesigns of 2 legacy maps that improved from the bottom of player rankings into the upper half.
- Mentored Level Designers and cross-functional teams, sharing expertise in proprietary tools, engine workflows and technical level design.
 - Mentored a team of 7 Level Designers (including 2 new hires) and provided technical training to VFX, Level Art and QA teams, accelerating onboarding and improving effective use of the proprietary engine.
- Collaborated with Engine and Tools Engineers to improve proprietary level editing tools and streamline level production workflows.

BrushBurger (NDA)

Level Designer | Freelance | 2023 – Present, 3 yrs 1 mos

- Design, prototype and iterate multiplayer FPS levels from initial blockout through gameplay implementation and playtesting for an upcoming Steam title.
- Collaborate within a multidisciplinary team of 10 developers, translating gameplay vision into engaging multiplayer spaces using Unity Engine.

Asterman

Game Designer & Developer | Contract | 2026 – Present, 5 mos

- Own the full development lifecycle of original mobile games, combining game design, gameplay systems, technical implementation and publishing.
 - Published Submarine Color Dive on Google Play.
 - Developed Hidden Meows for Android and iOS, currently in closed testing.
